3. DISCUSSION

All committee members please refer and review the email in regards to the manual

Coleen forwarded the email message from Neke to GAassess@unm.edu with subject line as “Academic Program Assessment Subcommittee Meeting Agenda and other documents. Coleen will request the Dean of Instruction office to print and bind the new Academic Program Assessment Manual for CARC members. Dr. Andrew printed the manual and notice after page 92 the tables are printing off the page. Coleen will check and send Neke an email if it prints off the page as well.

Apart of the discussion was to request Faculty Senate to place CARC on the agenda for the next faculty senate meeting to share the new Academic Assessment Program Manual for review and then to request to
be placed on the next faculty agenda to endorse the manual – in principle.

4. DISCUSSION

Review of Recommendations for each Program Assessment Plan

All committee members in their assigned sub-review group will get together before the next meeting on 09/25/15 and create a group recommendation list for each assigned program assessment plan. Apart of the discussion were the variations of the program review template. Committee members discussed this intently and determined that the program coordinators have worked persistently on ensuring they submitted their program assessment plans. Because there were multiple templates shared throughout the years, the committee strongly felt that the submission were acceptable and met the required request. However, moving forward, ALL new and updated submission will use the Program Assessment Plan template located on the UNMG Assessment website at url http://www.gallup.unm.edu/vert/faculty-staff/assessment.php. Another concern was the usage or missing cover sheet for academic program assessment plans. The committee members were in agreement to include the cover sheet in all program assessment plans. Once the committee members have met and discussed the sub-review group's recommendation list, CARC will notify and send out notification regarding a workshop on implementing/incorporating the recommendations. The idea is for program coordinators to have their electronic program assessment plans loaded on the computer and the committee members help incorporating the recommendations. Once the changes are implemented, CARC will approve using the cover sheet for academic program assessment plans. Including the cover sheet will document CARC's endorsement of program assessment plans. All approved/endorsed assessment plans will be converted to a PDF format and placed on the UNMG Assessment website as documentation and evidence. Further discussion was shared amongst the committee in regards to obtaining assessment plan reports at the end of the year. The committee members were in consensus that reporting was not very strict and collection of reports was sporadic. As a result, we will communicate to program coordinators to begin gathering evidence in their SLO’s results and measures.
