

**Report to UNMG Dean and Faculty Assembly:
2022 Program Review of *AS in Medical Laboratory Technology***

During Spring 2022, The UNMG Curricula Committee evaluated the Program Review documents submitted by the UNMG Division of Education, Health, and Human Services. On 15 April 2022, after careful consideration, the Curricula Committee unanimously **approved the Program Review for the *AS in Medical Technology*** with a request for minor revisions. The revisions were completed and the PR was resubmitted as requested by 31 May 2022.

Other than the very minor revisions requested, the committee members noted that this PR was well-written and organized and followed closely the PR Instrument. Each section in the PR contained specifics that described or analyzed data relevant to this degree program. All committee members completed written evaluations of the PR and noted that this PR was complete and offered a clear analysis and description.

The committee is confident that the *AS in Medical Laboratory* continues to contribute to UNM Gallup's mission to the region. The faculty managing the AS in MLT have a clear strategic vision regarding their field and placing students into employment related to their degree program.

Lora Stone, Ph.D.
Chair, UNMG Faculty Assembly Curricula Committee
UNMG Associate Professor
