

**Report to the Dean and the Faculty Assembly: Certificate in Construction
Technology**

Carolyn Kuchera
Faculty Assembly Curricula Committee Chair

The University of New Mexico-Gallup's Certificate in Construction Technology Program was reviewed at the April 16, 2021 meeting of the Faculty Assembly Curricula Committee. In a unanimous decision and after carefully reviewing the documentation submitted by the Division of Business and Applied Technology, **the committee voted to approve the Certificate in Construction Technology Program Review with minor revisions.** The committee set a December 2021 deadline for the requested revisions, which were communicated directly to the Division Chair at the April 2021 meeting.

The committee believes the Certificate in Construction Technology Program is well positioned to continue to prepare area students for gainful and fulfilling employment opportunities.
