

CEO Weekly Brief – 6/7/2019 Dr. James Malm

Welcome to Summer 2019:

Summer 2019 is off to a great start. I want to welcome back our students and faculty and everyone else who took advantage of the intercession to enjoy a break. Our numbers are looking very good for summer as we are up 17% in head count and 11% in student credit hours over the same time last year. We are currently offering 68 sections taught by 38 faculty.

Please click below to see the enrollment management dashboard for this week as well as the schedule of summer classes.

Summer 2019

Published: 6/3/2019

Enrollment Management Dashboard for the week of 6/3/2019 for summer 2019.

The image shows a screenshot of a class schedule for Summer 2019. The table is organized into several columns: Course ID, Course Title, Credits, Days, Times, and Instructors. The schedule lists numerous courses, including various levels of English, History, and Business classes. Some courses are marked as 'Prerequisites' or 'Corequisites'. The schedule is presented in a grid format with a yellow header row.

Summer 2019 schedule of classes

Environmental Scan Interview:

Our Senior Institutional Researcher Brittany Babycos was able to share the content of our environmental scan with the local listening audience this weekend as a result of an interview she had with Sammy Chioda. The interview played on all four of the Millennium Media stations Sunday morning and I was able to catch one of them. I appreciate Brittany’s willingness to share the results of the scan as well as the planned uses for the information collected throughout the environmental scanning process. We will be putting a recording of the interview on the UNM-G website within the next week. A copy of the environmental scan can be viewed on the [institutional research web page](#).

Chief Executive Officers:

Thanks to Dean of Instruction Dan Primozić and Director of Business Operations Robert Griego for serving as acting CEO’s while I was traveling out-of-state during the Memorial Day holiday week. The time away from campus was relaxing, especially knowing that operations were in such capable hands.

Dr. Daniel Primozic
Dean of Instruction

Robert Griego
Director of Business Operations

Trans-Atlantic Business and Investment Council:

The Greater Gallup Economic Development Corporation is involved in a very exciting project to recruit foreign businesses to McKinley County. As part of this initiative, GGEDC has formed a working relationship with the Trans-Atlantic Business Investment Council (TBIC) who serve as site selectors for European companies who are investigating the possibility of locating a business in the United States. Since 2017, in fact, the GGEDC has been a member of TBIC and is the first economic organization from New Mexico to gain membership.

GGEDC is working diligently to obtain a Foreign Direct Investment (FDI) designation which will allow for promotion of the Gallup-McKinley County market to European industries. According to GGEDC Deputy Director Michael Sage, “With the FDI community certification, TBIC will market Gallup-McKinley County to European manufacturing firms. The FDI community certification indicates that Gallup-McKinley County has the necessary education infrastructure, talent pool, community support and existing base of manufacturers to support new manufacturing.”

There will be a TBIC workshop June 6-7 which Dean Primozic and Mark Remilliard, division chair of business, applied technology and workforce development, will be attending as I will be off-campus on out-of-state travel. Please click below to see the workshop agenda.

Tech Days:

Tech Days at UNM is a very exciting time where faculty, staff and students can learn about, participate in and work directly with innovative technologies at the University. This sharing of information is a great way to learn about the present and future needs and solutions which will be available to help educate and manage the University.

Senior Institutional Researcher Brittany Babycos will be presenting at Tech Days. Her presentation is titled “Business Intelligence on a Budget,” and discusses the creation of the recent Enrollment Management Dashboard which is released each Monday and is available for viewing on the institutional research secure website.

Click below to see the Tech Days program as well as Brittany’s slide deck from her presentation.
