

RESEARCH EXPERIENCES FOR UNDERGRADUATES IN EARTH SCIENCE AND CIVIL ENGINEERING

The University of New Mexico Gallup is offering a 8 week Summer Research Experience for Undergraduates in Gallup, NM. Over the summer, participants will conduct cutting edge research while learning computer and statistical modeling. Participants will work with a team of researchers across the country to understand the behavior of coastal river systems.

APPLICATION AND ELIGIBILITY

The program is open to undergraduate students interested in civil engineering, geosciences, ecology, mathematics, or related fields. We encourage applications from students who have been historically under-represented in Science – women, Native Americans, nontraditional students, first generation college students, and veterans.

PROGRAM BENEFITS

- \$5000 stipend
- Professional development and technical skill training
- Funding to present research at a conference

APPLICATION DATES

Opens March 1, 2019

Closes April 26, 2019

PROGRAM DATES

July 1 – August 16, 2019
