COVID-19 PREDICTION MODEL SHOWS MASK EFFECTIVENESS:

A new Covid-19 prediction model makes another compelling case for wearing masks and cloth face coverings. If practically everyone in America wears masks while out in public, it could prevent tens of thousands of Covid-19 infections and deaths by the fall, according to researchers at the University of Washington’s Institute for Health Metrics and Evaluation (IHME).

Universal mask usage could prevent nearly 45,500 projected Covid-19-related deaths by Nov. 1, or about a 58% reduction. You can read the full article here.
