

American Professor Florentin Returned Home after Studying Extenics in China

On May 19, 2012, Professor Florentin Smarandache (third from left), a world class expert in Extenics research and Dean of School of Mathematics of New Mexico State University of U.S., came to learn and study Extenics in Research Institute of Extenics and Innovation Methods, Guangdong University of Technology, and returned home after finishing study on August 14. During his studying time, he has successfully participated in the proof-reading process of the English version of the monograph “Extension Engineering” and composed five papers on Extenics.

In the past three months, Professor Florentin Smarandache’s spirit of careful learning and active study has set a good example for Extenics researchers.
